74	C# (as C)			

v1 You can't beat easy answers,
The best thing that we've got:
The power of a simple phrase
That neatly matches means to ways
Will find the good in too good to be true,
And see us first in everything we do.

v2 You can't top wishful thinking,
It hits the perfect spot;

The pairing of a simple thought,
With any satisfaction sought,
Will forge the best from hoping for the best,
And make us stand a cut above the rest.

v3

You can't trump quick solutions
They offer us the lot:
The hatching of a simple scheme,
So snugly based on any dream,
Will make things so by wishing they were so,
And bring the spoils that others must forego.
