v1 I need an urgent upgrade:

The guidance systems, finely tuned and primed,
Fire high and wide and handsome every time;

v2 I need the latest install:

The version purring noiselessly below
Throws error codes that sum to overflow;

Br The bits that work, don't work too well,

And those that don't, just don't,
Those that couldn't go, don't go,
And those that could, still won't;
The sticky tape that held them down's
Not sticky anymore,
Reducing them to random piles
Of bits across the floor -
And I don't know what half of them are for.

v3 I need an urgent upgrade:

The well-oiled cogs performance rests upon
Show state of art that creaks of long since gone.
